CHARACTERISTICS

Driver workplace

Ergonomics

- Spacious driver's cab and ergonomic seat ensure fatigue-free working
- Optimum view of both the load and surroundings
- Layout of control elements reduces the physical strain on the driver
- Separation of the workstation, mast, and drive and steering axles reduces physical strain on the driver, including on uneven surfaces

Linde combi steering axle

Handling

- The twin-motor front-wheel drive together with combi steering axle provides exceptional maneuverability
- Overhead tilt cylinder and warp-resistant mast design ensure safe load handling
- Synchronous reluctance motor for lift and drive function increases power and energy efficiency
- A choice between lead-acid, lithium-ion battery, or fuel cell energy-storage systems
- Wireless access to driver data allows data analysis and connection to logistic, safety, and fleet management systems

All-round visibility

Safety

- Chassis, A-pillar, mast, and roof construction provide the driver with optimum visibility of the load and surroundings
- The truck's low center of gravity reduces the risk of tipping
- Linde Curve Assist reduces speed in relation to the steering angle when cornering
- Linde Load Assist reduces the risk of tipping accidents when moving loads at height
- Automatic parking brake inclusive hill-hold function

Easy service access

Service

- Long service intervals e.g. 6000 h/3 years hydraulic oil/filter change
- Easy access to main components
- Driver display shows all important truck information to the driver
- Remote fault diagnosis and firmware updates can be conducted without a service technician, in turn saving costs
- Truck Health Monitoring enables comprehensive fault monitoring and faster fault localization wear and damage is identified early thus increasing truck availability
- Modular assemblies allow for quick replacement, shortening downtime during repairs
